

AJITH KUMAR

Junior AI Engineer | AI Product Builder | Agentic AI | LLM Systems | Python | FastAPI

Ph: +91 86080 04294 | ajithtitans7@gmail.com | linkedin.com/in/ajith-kumar07 | ak-ai-portfolio.vercel.app

PROFESSIONAL SUMMARY

Junior AI Engineer and product-minded builder with hands-on experience designing end-to-end LLM, agentic AI, and automation systems across backend engineering, document intelligence, and growth-focused applications. Strong foundation in Python, FastAPI, RAG, vector search, LangChain, LangGraph, cloud AI services, and production AI workflows. Experienced in converting ambiguous business problems into scalable AI products, internal platforms, and decision-support systems. Combines AI engineering depth with product thinking, stakeholder alignment, experimentation, and system reliability practices to deliver explainable, production-ready solutions that improve operational efficiency, decision-making, and user outcomes. Now optimized for Junior AI Engineer, AI Engineer, and Applied GenAI roles.

TECHNICAL SKILLS

Category	Skills
Programming & Backend	Python, SQL, FastAPI, REST APIs, SQLAlchemy
LLM & Agentic AI	RAG, Embeddings, Vector Search, LangChain, LangGraph, CrewAI, MCP, Google ADK, Prompt Engineering, Hugging Face, OpenAI GPT-4o
Cloud & AI Infrastructure	Azure OpenAI, Azure AI Services, AWS, Docker, MLflow, LangSmith, deployment monitoring, tracing
AI / ML & Deep Learning	TensorFlow, CNNs, Scikit-learn, semantic retrieval, document intelligence, Vision AI
Frontend / Integrations	React, Google Sheets API, Facebook Marketing API, WebRTC
Analytics & Marketing Systems	Google Ads, Meta Ads, Google Analytics, CRM, campaign performance analysis

SELECTED PROJECTS

Kampaign.ai - AI-Native Campaign Optimization Engine

Python, FastAPI, OpenAI GPT-4o, Facebook Marketing API, PostgreSQL, React, SQLAlchemy, Google Sheets API, Scikit-learn

- Built an end-to-end agentic AI system that detects, decides, and executes Facebook campaign optimizations with a real-time feedback loop.
- Developed an AI insights engine using LLMs for campaign analysis and natural language querying over live performance data.
- Implemented a Vision AI module to evaluate ad creatives across key performance metrics and generate actionable improvement suggestions.
- Designed an AI strategy generator to create full-funnel marketing plans with benchmarks and projections from minimal inputs.
- Integrated human-in-the-loop feedback to refine AI recommendations and improve decision accuracy.

VisionAudit AI - Azure OpenAI Powered

Python, Azure OpenAI, LangChain, LangGraph, RAG, Embeddings, FastAPI, Azure Cloud, LangSmith, Vector Database

- Built a production-ready RAG system using Azure OpenAI for enterprise document intelligence.
- Designed an end-to-end architecture to ingest large-scale PDFs, chunk content, generate embeddings, and store them in a vector database for semantic retrieval.
- Implemented intelligent query routing and context-aware response generation using LangChain and LangGraph.
- Integrated Azure OpenAI GPT models for grounded response generation with hallucination control.

VoiceHire_AI - Real-Time Voice AI Interview Coach

Python, Pipecat, WebRTC, Deepgram, Groq LLM, Cartesia, Silero VAD

- Built a low-latency, full-duplex Voice AI system for real-time technical interviews using streaming STT, LLM inference, and TTS synthesis via Pipecat pipeline architecture.
- Engineered intelligent turn-taking and silence detection using Silero VAD and LocalSmartTurnAnalyzer to enable natural conversational flow.
- Designed context-aware multi-turn conversation management using LLMContext aggregation for structured interview state and dynamic follow-up questioning.

- Developed a WebRTC-based frontend enabling real-time browser communication with live transcript streaming and media track handling.

PROFESSIONAL EXPERIENCE

Junior AI Engineer

Day0 Ai Enterprises (SaaS platform for industry automation)

Aug 2024 – Present

- Supported the design and delivery of AI-powered SaaS features using Python, FastAPI, LLM APIs, and agentic workflows.
- Built and maintained backend services for AI product capabilities including API orchestration, prompt workflows, model integration, and deployment support.
- Contributed to document intelligence, semantic retrieval, and decision-support modules for industrial automation use cases.
- Implemented RAG-based pipelines for structured and unstructured data, improving grounded responses and knowledge access across business workflows.
- Worked closely with engineering, product, and stakeholders to convert ambiguous business needs into scalable AI features and roadmap-ready solutions.
- Contributed to agent-based systems for task execution, human-in-the-loop optimization, and workflow automation using LangChain, LangGraph, and modern AI tooling.
- Implemented observability, tracing, testing, and evaluation practices to improve reliability, explainability, and release confidence.
- Participated in sprint planning, requirement grooming, and iterative delivery cycles to support fast-moving SaaS development.

Associate AI Engineer

SS Consulting Agency

Jun 2022 – Jul 2024

- Contributed to AI and automation use cases at the intersection of growth systems, digital operations, and intelligent workflow optimization.
- Worked on data-driven campaign and audience analysis using analytics tools to monitor performance, conversion behavior, and optimization opportunities.
- Supported AI-enabled experimentation and performance improvement initiatives by analyzing audience behavior, click patterns, and conversion trends.
- Prepared performance reports and contributed to optimization through testing, refinement, and feedback-driven iteration.
- Collaborated on digital systems and execution workflows that supported marketing and growth-focused decision-making.

CERTIFICATIONS

- Advanced Certification in Data Science and AI - Intellipaat
- Microsoft Certified: Azure AI Engineer Associate (AI-102) - target certification aligned to Azure AI Engineer role
- Microsoft Azure AI Fundamentals (AI-900)
- Generative AI with Large Language Models
- LangChain / RAG / Prompt Engineering coursework

EDUCATION

MSc. Software Systems

Sri Krishna Arts & Science College | 06/2017 - 05/2022

School Education

PSG Sarvajana Hr. Sec. School, Coimbatore, Tamil Nadu

ATS KEYWORDS

Junior AI Engineer, AI Engineer, AI Product Builder, Generative AI, LLM Engineer, Python, FastAPI, REST API, SQL, SQLAlchemy, RAG, Vector Database, Embeddings, Semantic Search, LangChain, LangGraph, CrewAI, MCP, Google ADK, Azure OpenAI, Azure AI Services, AWS, Docker, LangSmith, MLflow, Prompt Engineering, Hugging Face, Agentic AI, AI Automation, Document Intelligence, Vision AI, WebRTC, Deepgram, Groq, TensorFlow, Scikit-learn, GPT-4o, Production Deployment, Monitoring, Tracing, Backend Engineering, AI Product Development, Industry Automation, SaaS, Human-in-the-loop, Workflow Automation.
